The diagram illustrates a linked list structure. It consists of several nodes represented by rectangular boxes. The nodes are labeled with values: 44, 60, 62, 70, 50b, and 18. The nodes are connected by arrows indicating the sequence of the list. The node containing 44 is on the left, with an arrow pointing to the right. The node containing 60 and 62 is at the top, with an arrow pointing down to the node containing 70. The node containing 70 has an arrow pointing left to the node containing 50b. The node containing 60 and 62 also has an arrow pointing down to the node containing 18. The node containing 18 has an arrow pointing left to the node containing 50b.
